About the Foundation

The New York Cancer Foundation was established in 2014, with the mission of helping relieve the financial stresses experienced by cancer patients. Financial grants are awarded to qualified patients in the NY Metro Area who are actively undergoing cancer treatment. The Foundation assists patients by awarding grants that help cover day-to-day living expenses such as rent or mortgage payments, utility payments, telephone and transportation costs, so patients can focus on their treatment and healing.

The New York Cancer Foundation has largely been funded by the physicians and staff of New York Cancer and Blood Specialists and has helped hundreds of patients and their families over past few years. Our goal is to grow the Foundation so that we can keep pace with the ever-growing needs of patients who need our support.

- Founded in 2016, New York Cancer Foundation has provided financial assistance to hundreds of cancer patients and their families
- The New York Cancer foundation assists patients with *any type of cancer*
- In 2018, the New York Cancer Foundation partnered with Uber Health to begin to assist cancer patients with transportation to and from treatment
- Over .98 cents of every dollar raised is utilized for patient grants
